

TCT HOLE SAWS by STEELMAX

TCT HOLE SAWS & HOLE SAW KITS

Premium Grade Solid Carbide Tipped Hole Saws

Carbide Holesaws cut fast, burr-free holes in all types of materials, from soft aluminum to tough-to-cut stainless and cast iron. Rugged construction for day in and day out use. All sizes have a shoulder to prevent plunge-thru, which is especially useful when drilling into electrical boxes. Carbide tips provide long tool life and clean cut. Carbide Holesaws dramatically outlast bi-metal holesaws and step drills. For materials up to 1/8" (3.2mm) thick. The Steelmax Carbide Holesaws feature a spring-loaded center pilot drill, ensuring precise hole location and efficient material core ejection post-cut.

FEATURES

- Ideal for structural & stainless steel, copper & other metals
- Longer life than HSS Hole saws
- Compatible with corded, battery, and pneumatic drills plus Magnetic drills that are outfitted with a chuck
- Wide variety of cutting diameters available

HOLE SAW KITS

Manufactured with top-quality solid carbide tips, our product ensures unmatched strength and durability. Designed to outlast traditional HSS hole saws, it guarantees superior wear resistance and prolonged usage.
