S14-M

14" Metal Cutting Miter Saw

Heavy-Duty Steel Cutting, Made Effortlessly Precise

Powerful 15 AMP Metal Cutting Miter Saw with Heavy-Duty Base

Professional results across pipe, solid round bar, square tubing, rectangular tubing, aluminum and structural profiles.

Your New Essential Tool

The S14-M gives fabricators, metalworkers, and industrial users the combination they need daily: power, accuracy, portability, and versatility in one machine. Built from the proven foundation of Steelmax's S14 chop saw, S14-M adds true mitering capability up to $\pm 46^\circ$, making it necessary for custom angles, fabrication layouts, repeatable production cuts, and job site problem-solving. For shops and crews that cut tubing, pipe, angle, channel, conduit, metal studs, rebar, plate, and structural profiles, that flexibility is essential.

If your work demands metal being cut accurately before it is welded, assembled, installed, or finished, the S14-M quickly moves from "nice to have" to "why didn't we have this sooner?"

sales@steelmax.com

Smart Intelligently designed with a double insulated motor utilizing class E insulation, and high-strength copper windings (stator & rotor), and a reverse self-locking power switch for safer, more reliable operation. Capacity of up to 4-3/4" on profile material, it merges pro performance into a compact 72 lb machine that can serve in any environment.

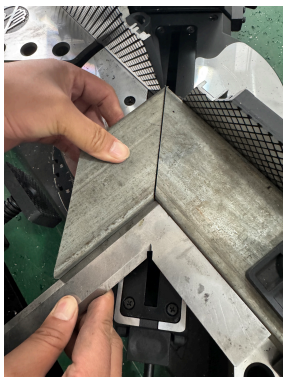

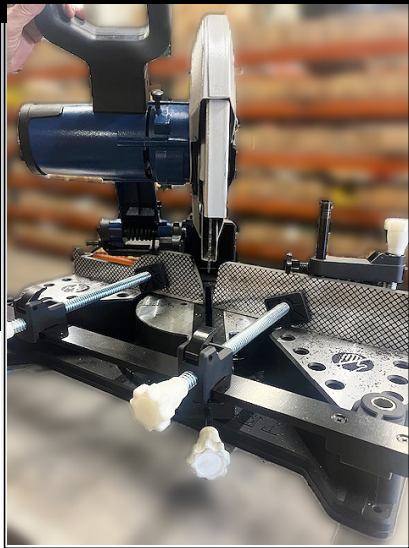

Rugged Powerful 1750 W motor, 14" blade, 1450 RPM cutting speed, heavy-duty aluminum base, strong clamping system are a perfect combination in this industrial design.

Applications

Mechanical fabrication, transportation, construction, metallurgy and power generation.

FEATURES

- Mitering capability of $\pm 46^\circ$
- Powerful 1750W motor
- 1450 rpm cutting speed
- Stable aluminum base
- 14" blade diameter
- Pipe capacity up to 4-3/4"
- 1" Arbor Bore
- Chip collection tray
- Includes a newly designed laser cut 14" TCT blade for cutting mild steel
